

LLB Show 2012

Solid State Logic in association with Benum Norway, will be attending this year's LLB show in Oslo.

At LLB 2012 SSL will be demonstrating its range of advanced audio solutions for music and broadcast. SSL's music production technology on show will include the industry leading **AWS 948** hybrid analogue console/DAW controller, **Nucleus**, **X-Desk**, **X-Rack**, **XLogic I/O** and **Duende Native** plug-ins. The **C10 HD** Compact Digital Broadcast Console will also be available for demonstration with SSL's range of Broadcast Production Assistants which streamline on air audio production.

SSL product specialists **Andy Jackson** and **Sam Wetmore** will be on hand to answer questions and conduct product demonstrations.

For more information or to book a personal demonstration, please **RSVP** using the contact details below.
